DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 33-35, 37-39, 42, 45-47, 49-51, 54, and 55 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-12 of U.S. Patent No. 6,165,192. Although the conflicting claims are not identical, they are not patentably distinct from each other because the relatively broad subject matter claimed in the instant application clearly would have been obvious in view of the relatively detailed subject matter of the patent claims.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3731

2. Claims 33-35, 37-39, 42, 45-47, 49-51, 54, and 55 are rejected under 35 U.S.C. 102(b) as being anticipated by Normann et al. (U.S. 5,215,088).

Normann et al discloses in figures 1-22, a electrode device that comprising the steps of holding a retinal electrode (32); and applying a multiple sudden forces to the retinal electrode (32) forcing said retinal electrode (32) into a retinal and into of an eyeball.

Allowable Subject Matter

3. Claims 36, 40, 41, 43, 44, 48, 52, 53, 56, and 57 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The following is a statement of reasons for the indication of allowable subject matter: None of the prior art of record disclose or suggest the retinal electrode includes barbs on a plurality of elongated spike electrodes so that will tend not pull out of the eyeball.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Takase (U.S. 4,920,968) discloses a needle base device and Clift (U.S. 5,452,716) discloses device for measuring the concentration of a substance in the blood.
